Advanced electronics for precise professionals

A compact machine capable of powerful, series and precision operation in a wide range of tasks

your perfect levels using he wide range of inctions and settings.

lectronic performance control

High density B/L Motor

Precision electronic clutch

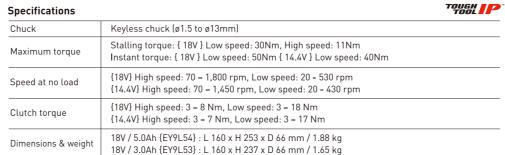

the need for life-time limited, bulky, and heavy mechanical clutch,

Cordless Drill & Driver EY1DD1

provided Two 65 mm bits can be stored in the base of the drill

| | | | Setting | 18V 5.0Ah | 18V 3.0Ah |

Panasonic

Cordless Drill & Driver EY1DD1

Power, speed and durability. Now with precision tightening function.

Panasonic's most compact and lightweight drill driver to date!

*1 In Panasonic's 14.4/18V drill/driver category Smart BL **Panasonic** 14.4V/18V **18V Cordless Drill/Driver** EY1DD1 1.88kg/ TOUGH Li-ion 18v 5.0 Ahr

Select the perfect setting for a wide range of tasks

Drilling

Tough and speedy wood drilling
The integration of new brushless
motor and vector control circuit
optimizes the power and speed
for heavy-duty serial drilling.
[See operation picture for details.]

Fine metal drilling surface finish Highest rotation speed limit (H1 – H3 settings) helps both clean surface finish and less wear on metal hole saw teeth.

Driving

Optimal clutch torque setting

Newly developed electronic clutch offers 600 different shut-off clutch torque between the combination of clutch and speed settings. Meets various fastening needs from precise to high-torque fastening. (See operation picture for details.)

Shut-off status LED indicator

Green light illuminates for 2 seconds when driving is complete with pre-set shut-off clutch torque, helping ensure correct tightness.

Tapping

Hassle-free rotation switching TAP mode has a unique feature which automatically switches from 'forward' to 'reverse' rotation. Making serial tapping

rotation. Making serial tapping easier, quicker and smoother while 'Tapping dust removal mode' will also add to convenience and efficiency.

Tapping Performance
• Steel (thickness 10mm): M4 - M8
• Aluminium (thickness 10mm): M4 - M
